

Mountain View Welding is a Division 5 Welding & Fabrication company in Longmont, Colorado. We have been serving and leading the welding revolution since 1990.

Job Opportunity: Welder/Fitter

Essential Job Functions:

- Identify steel shapes, sizes, and mill tolerances.
- Weld together structural, plate or miscellaneous steel fabrication according to the weld symbols, weld procedures, dimensions shown on the shop drawings, and AISC code requirements.
 - Preheat and/or cut work pieces using a hand torch when required.
- Clean welds of excess weld, splatter or slag using chipping hammers, wire brushes or grinders.
 - Fabricate sub-pieces of the overall assembly as trained and instructed.
- Identify shop drawing errors and discrepancies before or during early stages of fabrication.
 - Operate forklifts, jib cranes, and overhead cranes in order to move materials.
 - Any other duties assigned by management.
 - Attend all meetings as required by management.
 - Consistently and reliably works scheduled hours at assigned locations.

Non-Material Handling Demands

- Employee is expected to work 40 hours a week. However, hours including overtime and weekends may be required based on MVW needs.
 - Hear sufficiently to be aware of safety issues.
- Visual ability to read and interpret cut lists and shop drawings. Safety glasses are required in the shop area.
 - Exposure to heat, cold, wet and humid conditions in the shop area OCCASIONALLY.
 - Exposure to fumes, odors and dusts in the shop area OCCASIONALLY.
 - Exposure to solvents, greases, oils, and coolants OCCASIONALLY.
- Wear all required Personal Protective Equipment. PPE includes steel-toe safety shoes, hearing protection, safety glasses, gloves, and hard hats.

Experience and Education Required:

- High School degree or equivalent.
- Minimum of six months of experience working as a welder for a steel fabricator or manufacturer, or a one-year degree or certificate in welding technology from a qualified trade school or college.
